- Leadership and Excellent Communication Skills
- Data and data analytics
- Strategic planning and analysis
- Project management
- Training and mentoring
- Research and business analysis
- Financial analysis and modelling
- Problem solving and critical thinking

Work History

Experienced Senior Assurance Associate

PricewaterhouseCoopers LLP (PwC Kenya),
Nairobi, Kenya

July 2025 - Current

- Trained and supported new team members, maintaining culture of collaboration and ensuring that the audit engagements are carried out in accordance with the set plan. This contributed to completion of all engagements I was involved in on time.
- Scheduled and coordinated regular update meetings with the managers and the partners to ensure they are brought up to speed with the audit progress. This ensured that there was incremental value to the client on their financial reporting processes trickling down from the audit partners and managers.
- Led IAS 29 audit workstreams, including testing management's restatement methodologies, validating key assumptions, and ensuring compliance with IFRS hyperinflation reporting standards.
- Prepared, coordinated and executed external audit engagements in a timely manner to ensure achievement of relevant deadlines as communicated by the clients.
- Led end-to-end audit segments for insurance clients, overseeing audit planning, execution, and completion while supervising junior team members and ensuring adherence to IFRS 17, regulatory requirements, and firm quality standards.
- Prepared task allocation schedules and required work resources that are in line with the engagement budgets. This ensured there was seamless teamwork in all engagements that I was involved in.
- Supported the engagement managers in the development of the audit approach which included risk assessment, obtaining an understanding of the business environment and tailoring an audit approach that fits the client.
- Delegated and allocated responsibilities to junior team members based on their experience. This ensured clear career growth path through mentorship.
- Verified client's compliance with various industry and statutory regulations, international accounting standards such as IFRS and IAS.
- Assessed and gave reports on the adequacy of internal control systems by completing audit questionnaires.

- Performed detailed testing of insurance contract liabilities, reinsurance arrangements, premium revenue, claims reserves, and actuarial inputs, identifying key risks and recommending adjustments to improve financial statement accuracy.
- Tested, analyzed and documented findings on complex business processes such as revenue recognition.
- Prepared audit reports based on the findings from the audit engagements.
- Prepared and reviewed financial statements and other key financial reports to make sure they are done according to industry standards.
- Managed audit workstreams for asset management entities, including oversight of investment valuation testing, net-asset-valuation calculations, fund controls, and regulatory compliance, ensuring timely delivery of high-quality audit deliverables.
- Analyzed and documented the going concern assessments for the businesses based on the cash flow projections and business strategies provided. This gave management a simplified view of whether businesses were able to finance their operations in the future based on the financial statements and reports they had.
- Reviewed complex financial instruments, assessed fair value measurement methodologies (IFRS 13), and evaluated internal controls over portfolio management processes, enhancing audit efficiency and risk coverage.

Senior Assurance Associate

PricewaterhouseCoopers LLP (PwC Kenya), Nairobi, Kenya

July 2024 – June 2025

- I trained and supported new team members, maintaining culture of collaboration and ensured that the audit engagements are carried out in accordance with the set plan. This contributed to completion of all engagements I was involved on time.
- I scheduled and coordinated regular update meetings with the managers and the partners to ensure they are brought up to speed with the audit progress. This ensured that there was incremental value to the client on their financial reporting processes trickling down from the audit partners and managers.
- I prepared, coordinated and executed external audit engagements in a timely manner to ensure achievement of relevant deadlines as communicated by the clients
- I prepare task allocation schedules and required work resources that are in line with the engagement budgets. This ensured there was seamless teamwork in all engagements that I was involved in.
- I supported the engagement managers in the development of the audit approach which included risk assessment, obtaining an understanding of the business environment to tailor an audit approach that fits the client.
- I delegated and allocated responsibilities to junior team members based on their experience. This ensured clear career growth path through mentorship.

- I prepared audit reports based on the findings of the audit engagements.
- I prepared and reviewed financial statements and other key financial reports to make sure they are done according to the industry standards.
- I analyzed and documented the going concern assessments for the businesses based on the provided cash flow projections and business strategies.

Assurance Associate

PricewaterhouseCoopers LLP (PwC Kenya), Nairobi, Kenya

September 2022 - June 2024

- I supported audit preparation through research and risk analysis and giving my insights to the engagement leaders
- I supported the development of audit approach and other audit planning procedures through documentation of the risk planning process.
- I reviewed and ensured the client's compliance with established internal controls procedures by examining reports, operating practices and documentation.
- I established and maintained working relationships with the client's team to ensure seamless communications through out engagements and projects.

- I verified client's reports on assets, liabilities, revenue, expenses by comparing data given to the existing supporting documentation.
- I evaluated analytical models, methodologies and estimates made by the client in the financial reporting process.
- I prepared audit reports and promptly communicated the audit findings to the engagement manager and the engagement leader.
- I tested and reported findings on the client's internal control systems compliance
- I tested and reported findings on the client's compliance on various statutory requirements and standards.
